BCDE Program

Bentleu[®]

Advancing Infrastructure

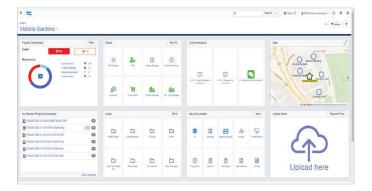

Organization-wide Digital Adoption and BIM Compliance

BCDE Program builds upon BCDE Project, our turnkey common data environment (CDE), enabling project teams to collate, control, and collaborate on project information within an ISO 19650-compliant environment for multiple projects and programs.

BCDE Program reduces the risk of errors from the start with a consistent approach to managing your common processes and ensuring compliance by providing a templated BIM framework environment for your organization. The application also offers a more traditional folder-based structure for document management and allows more configurability for non-ISO 19650 workflows, providing the opportunity to reflect your organization's specific processes.

STANDARDIZE DIGITAL DELIVERY

You can either purchase BCDE Program directly or upgrade to it from BCDE Project to standardize digital delivery approaches across programs and multiple projects. Our templated and consistent approach benefits your project teams by connecting them, and standardizing workflows with your extended supply chain, as well as encouraging users to replace email and unsecure file sharing sites with an intuitive, scalable, and secure CDE.

Extend your capabilities by integrating layers of open data and SSSI to your projects and assets.

IMPROVED PROJECT EFFICIENCIES

The BCDE environment is designed to make day-to-day usage easy for users, managers, and administrators. BCDE reduces the time and effort users spend adding, managing, and searching for the right information. BCDE's saved searches, views, and reports deliver precisely what a project team needs to do the job. You can also view, search for, and navigate to specific project or asset information quickly, with map views, listing views, folder views, and dashboards.

BCDE PROGRAM IS IDEAL FOR:

- Contractors and consultants looking to improve project delivery across programs of work or multiple organizations.
- Clients and asset owners that want to digitalize built estates and ensure supplier-delivered project information meets and maintains defined information management standards over the lifecycle of the asset.

Access project, asset, and organization information from your homepage.

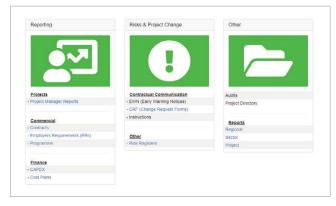

SYSTEM REQUIREMENTS

OPERATING SYSTEM: Supports all systems with standard web browsers **SUPPORTED BROWSERS:** Explorer/Edge/Chrome/Firefox/Safari **CONNECTIVITY:** Internet connectivity is required

BCDE Program At-A-Glance

DOCUMENT MANAGEMENT AND CONTROL

- Central location for all documents
- Formal document transmission using workflows for checks, reviews, and approvals
- Document naming conventions Automatic document numbering and document placeholders
- Document naming conventions ensure ISO 19650 compliance
- Version control All the latest file versions are readily available to avoid spending time searching for them
- Immutable audit trail Detailed audit trail across the system records who did what and when, ensuring that data is accurate
- Drag and drop files Upload multiple files by dragging and dropping them into the project in one easy step
- Tag files with metadata
- Choice of filing systems Choose between a traditional folder structure, or an open collection system that tags and sorts using metadata or a combination of both
- Powerful searching Simple options for searching and indexing millions of documents directly from the homepage
- Project information handover Streamlined file transfer from source CDE to destination CDE, reducing error risk and accelerating handover

BCDE is the hub for all your organization's information management and reporting.

BUILDING INFORMATION MODELING COMPLIANCE

- Support for industry standards ISO 19650 standard out of the box through enforcement and verification of file naming conventions and the controlled review of deliverables
- View 3D models and data Fully integrated IFC viewer enables walkthroughs and early decision-making to reduce error risk. All IFC files are viewable via web browser
- Federate and clash detection IFC models from various disciplines can be viewed individually or while federated to detect errors or clashes
- Viewing and markup Online document viewing from any device

COMMUNICATION AND COLLABORATION

- File transfer and project collaboration Securely upload and exchange model files, drawings, and documents with the ability to issue, review, discuss, comment, and approve from a single location
- Task dashboards Multiple dashboards track all incoming and outgoing tasks and are available through your project dashboards on a user and company level
- Collaborative Workflows/Shared/Published/Archived Work on documents in controlled and managed areas as required by ISO 19650 standards
- External users Email links to documents and workflows to people outside of your project or your system
- Report progress Use powerful keyword search tools for specific projects or search systemwide
